

LifeLine•DVD

INTELLIGENT BACKUP APPLIANCE

No complicated steps to remember! No bulky manuals to study! No special training required!

The difficult work is already done! In fact, optimized backup schedules automatically start within minutes after you add LifeLine•DVD™ to your network. The familiar and highly intuitive interface offers the control you need right at your fingertips. Intelligence is built-in every step of the way.

Status area tells you what DVD to insert and what is being backed up now.

LifeLineDVD backs up your entire network. New computers are discovered automatically.

See at a glance when data was last backed up!

Show only the computers and folders you want to see.

Need files from a retired PC or traveling Laptop? Just select the files, point your cursor to the destination PC, and click!

Time and date stamps are displayed so you can easily restore any version of any file at any time!

Intelligent backup, familiar interface, strong data encryption, fast restores, automatic archiving, highest quality and lowest cost storage media!
